

Zurich, Hardfeld.

City logistics hub with an integrated rail connection for the city's supply and waste disposal.

The Hardfeld area is an important location for logistics and commerce. Situated in a central location between Hardbrücke and Duttweilerbrücke, the site is ideally integrated into the rail network. The aim is to make the most of the considerable potential for freight transshipment by rail, to link the site with the urban district and to contribute to heat reduction and biodiversity with the design.

Plot area

70 000 m²

Address

Hohlstrasse 188
8004 Zürich, Schweiz
